Medical Officer of Health

J. K. PATTERSON Chief Public Health Inspector

R. GARDENER Assistant Public Health Inspector

B. MAKEPEACE Student Public Health Inspector

A. SUMMERS Clerk

*To the Chairman and Members of the Urban District Council
of Hexham :*

Mr. CHAIRMAN, GENTLEMEN,

I have the honour to present my Annual Report for the year ending 31st December, 1967.

Conditions in Hexham have changed little during the year, although the number of visitors, and the number of cars, appear to be increasing rapidly. The town is an attraction because of its charm and historic interest, and it has not yet lost the character that has so much appeal. It is fortunate in having so many open spaces and well-tended public gardens, and increasing use is being made of them. The main importance of Hexham is as the administrative and cultural centre of the area, and as the market town and shopping centre of the large agricultural district that surrounds it. As well as the offices and shops that supply these needs there is quite a wide diversity of employment. Sites on the new Tyne Mills industrial estate have been well taken up, and while some are being used for the replacement or expansion of existing light industry others have attracted new undertakings. The picture to be presented is of a busy and prosperous town with almost full employment, but showing no signs of expansion over many years.

The population of Hexham increased by only 20 during the year, and its estimated population in the mid-year of 1967 was 9,730. There was, however, a natural increase of births over deaths of 35, reversing the trend of 1966. There has been much building of private houses in the town of recent years, and one would expect a much higher increase in population, and there must be a considerable movement out as well as in. There has, however, been some change compared with previous years. The birth rate is above the national average, and is in fact the highest for twenty years, and for the first time there were no infant deaths. The general death rate is close to the national figure, and as in previous years, the age at death was high — two-thirds of the deaths occurred in persons over 70 — and the main causes of death were heart disease and degenerative diseases. There were five deaths from lung cancer, a low figure, and ten from other diseases of the respiratory system. It is obvious that the town contains a preponderance of older people, many living to an advanced age.

The table of infectious diseases notified has lost much of its significance of recent years, but no-one can regret the continued absence of diphtheria and whooping cough, poliomyelitis and the enteric fevers, and the virtual disappearance of tuberculosis. Measles accounted for almost all the notifications during the year, and it is the next infectious disease against which protection will be offered to the susceptible. Investigations continue to be carried out into cases of gastroenteritis, which are still common, but in only a few cases was a specific cause found and the others were presumably of virus origin. Four cases of dysentery were however found, and one case of salmonella infection, acquired abroad. One case of pulmonary tuberculosis was notified in a middle-aged man, and while this disease is now relatively uncommon, it is not to be regarded lightly and full investigation of contacts is carried out. With only two farms producing unpasteurised milk, regular investigation for the presence of *Brucella abortus* can be undertaken, and informal action was necessary when one herd gave a positive culture test.

The housing situation in Hexham is satisfactory, and with the Council owning one-third of the houses the general need appears to have been met. The housing list is shorter and the cases are less urgent and casual vacancies provide sufficient turnover. A few general purpose houses are however being built where sites exist on Council estates. The housing needs of older people have still to be met, and further bungalows are required. Even more necessary is the proposed hostel to provide sheltered accommodation for the frail elderly, as a half-way house between ordinary housing and the hospital or Part 3 accommodation, and work on this scheme is proceeding.

The Newcastle and Gateshead Water Company, as statutory water undertakers, continue to supply water of satisfactory quality and quantity to the town. The Council are responsible for the few private sources that remain, and carry out routine investigations, and give advice and assistance where necessary. The Company undertake very frequent sampling of the mains supply the Health Department take infrequent check samples, and each makes known its results to the other. There is excellent co-operation, and prompt attention is given to complaints.

With completion of the joint sewerage scheme with Hexham Rural District during the year, the sewage disposal

facilities can now be considered adequate. It is a cause for satisfaction that in replacing outworn treatment works, the site on Tyne Green, which was a potential danger to health, has been discontinued, and this beautiful stretch of the River can now be more safely enjoyed.

Mr. Hugh Mitchell retired as Senior Public Health Inspector in May 1967, after twenty-nine years' service with the Council. He brought wide experience outside Local Government to his appointment, and his ability and conscientiousness were outstanding. These qualities were combined with an approachable and helpful manner, and account for the high esteem in which he was held by me, and the other members of the staff, by the Councillors and the general public. He carries the good wishes of many people in his retirement.

Mr. J. K. Patterson, who has served as Assistant Public Health Inspector for fourteen years, was promoted to fill the vacancy, and with his knowledge and experience of the town should prove a capable senior officer. Mr. R. Gardener was appointed his assistant, and is showing himself an industrious and useful member of the staff.

The Public Health Committee consists of the whole Council, and I am grateful to the Councillors for the support and encouragement they have given to the Department during the year. I am grateful, too, for the courtesy and co-operation shown by the Clerk and other Officers, and to the staff of the Health Department for their efficiency and loyalty.

I am, Gentlemen,

Your obedient Servant,

J. M. McEWAN,

Medical Officer of Health.

HEALTH SERVICES OF THE AREA

1. Hospitals

There are in the district two hospitals, namely the Hexham General Hospital and the Hexham War Memorial Hospital under the management of the Hexham and District Hospital Management Committee. These hospitals together with others in the area under the Hexham and District Hospital Management Committee and the Newcastle group of hospitals are available to cases from the area.

Cases of infectious diseases requiring admission to hospital are referred to the City Hospital for Infectious Diseases, Newcastle upon Tyne.

2. Ambulance Service

The British Red Cross acting as agents for the Northumberland County Council provide an ambulance service which serves the district. An ambulance station is situated at West Orchard, Hexham.

3. Home Help Service

The Northumberland County Council Home Help Service is in operation in the district. Home Helps are available to householders where such help is required owing to illness or confinement and their services are obtained through the office of the West Area Health Sub-Committee.

4. Local Authority Clinics

The following Clinics are held in the district :

Child Welfare Clinic : Abbey House, Hexham.

Friday, 9-30 a.m. — 12 a.m. and 1-30 p.m. — 4 p.m.

Ante-Natal Clinic : Abbey House, Hexham.

Second and third Tuesdays in every month, 1-30 p.m.
— 4 p.m.

First, second and third Wednesdays in every month,
1-30 p.m. — 4 p.m.

Women's Advisory Clinic : Abbey House, Hexham.

Every Thursday, 2 p.m. — 4 p.m.

Cervical Cytology Clinic : Abbey House, Hexham.

Fourth and fifth Wednesdays in each month, 2 p.m.
— 4 p.m.

Relaxation Clinic : Abbey House, Hexham.

Every Tuesday, 1-30 p.m. — 4 p.m.

5. Midwifery and Home Nursing

These services are administered by the Northumberland County Council and in this district are combined. There are two Nurse Midwives working in the Hexham Urban District.

REPORT OF THE PUBLIC HEALTH INSPECTOR

(MR. J. K. PATTERSON)

PUBLIC HEALTH ACTS

Sanitary Circumstances

Drainage Works

All drains are tested by smoke or by hydraulic test.

Total length of 4" drain 3,049 ft.

„ „ „ 6" „ 256 ft.

New properties 30

Improvements to existing properties 19

Sanitary conveniences

Additional baths provided 45

Additional sinks provided 45

Notifiable Diseases

Investigations were carried out in connection with one case of food poisoning, causative agent salmonella bredney, occurring in a person who had recently returned from holiday abroad.

Four cases of sonnei dysentery were investigated. In all the above cases contacts were also checked. A total of 32 faecal specimens were submitted to the public health laboratory for examination and report.

There are no Common Lodging Houses within the District.

Disinfestation

The eradication of vermin and parasites is carried out with the use of approved insecticides.

Regular spraying of the Council's refuse tip was carried out during the months of May—August, the result of which was a noticeable reduction of flies and other insect pests.

The modern aerosol container is proving to be the answer to the domestic fly problem, and advice on the types and usage is given when requested.

Swimming Pool

There is one privately owned swimming pool in the area which is used by members of the public, and regular samples are collected during the season, 12 being obtained during this period, all of which were found to be satisfactory.

Water Supply

The supply of water through the town's mains is administered by the Newcastle and Gateshead Water Company Limited, whose officials have always been co-operative and helpful when any situation arose in which the department was concerned.

Regular sampling of water from both the Gunnerton and Ladle Wells supplies was carried out, the public health laboratory at Newcastle being responsible for the necessary examination and report.

Number of samples collected by the department	29
Number of samples collected by the Water Company	20

By courtesy of Dr. A. T. Palin, Chief Chemist to the Newcastle and Gateshead Water Company, the following typical analyses of water from Ladle Wells and Gunnerton is reproduced.

Typical Analyses of Water from Ladle Wells and Gunnerton

FOOD AND DRUGS ACT 1955

Systematic inspections of food premises and food factories have continued during the year and standards of such premises remain satisfactory.

Food Hygiene (General) Regulations 1960

There are 106 food premises of various types within the district, 64 of which are registered under the main Act. Systematic visits of inspection were made during the year and the general standard of both the premises and the personnel remains satisfactory.

The following table details the food premises within the district :

Type of Business	Total No.	No. complying with Reg. 16	Premises to which Reg. 19 applies	Number fitted to comply with Reg. 19
Bakehouses.. ..	5	5	5	5
Butchers	9	9	9	9
Grocers	17	17	15	15
Catering Establishments ..	14	14	14	14
Greengrocers ..	5	5	5	5
Wet fish shops ..	3	3	3	3
Fried fish shops ..	3	3	3	3
Ice-cream dealers/ sweets	50	50	3	3

Ice-Cream Heat Treatment Regulations

Two producers are registered in the district. Problems were encountered in one of these during the year, and after considerable investigation work, the processing fault was found. During this period the manufacturer concerned co-operated with the department to the full.

There are 53 premises registered for the sale of ice-cream, and in all cases the hygienic standards are satisfactory.

Number of new registrations during the year .. 3

Number of samples collected 26

Results of examination :

Grade 1	..	16
„ 2	..	5
„ 3	..	2
„ 4	..	3

Milk Special Designation Regulations 1960

Routine sampling for keeping quality of milk arriving in churns at the local dairy was carried out until October when the plant concerned changed to bulk tank supply.

The County Health Department carried out the necessary sampling of heat-treated milk obtained from the various dealers in the area including those supplying the local schools.

Number collected for report on keeping quality
(Methylene-blue) 100

Brucellosis

The supply of milk from the 3 producer retailers in the district was sampled according to the procedure laid down in the Ministry of Health Circular 17/66.

(1) Number of samples of raw milk examined 38

(2) Number of positive samples found .. 1

In the case of the positive samples, the animals concerned were isolated and their milk sent for heat-treatment. Samples were taken from each of the eighteen cows in the herd and two were found to be positive in the ring test. On subsequent biological examination, however, results were negative.

The Liquid Egg (Pasteurisation) Regulations, 1963

(i)	Number of egg pasteurisation plants in the district	Nil
(ii)	Number of samples of liquid egg submitted to the Alpha-Amylase test and their results	Nil
(iii)	Comments on the year's administration of these Regulations	—

Poultry Inspection

(i)	Number of poultry processing premises within the district	Nil
(ii)	Number of visits to these premises.. ..	Nil
(iii)	Total number of birds processed during the year	Nil
(iv)	Types of birds processed	Nil
(v)	Percentage of birds rejected as unfit for human consumption.. .. .	Nil
(vi)	Weight of poultry condemned as unfit for human consumption.. .. .	Nil
(vii)	Comments on poultry processing and inspection	Nil

The Food Hygiene (Markets, Stalls & Delivery Vehicles) Regulations 1966

These regulations came into force on the 1st January of this year, and their aim is to improve the standard of hygiene in respect of market stalls and delivery vehicles. The Council's own market stalls have been brought up to a suitable standard and whilst difficulties have been encountered in the practical compliance within the requirements by traders, in general they have co-operated with the department in conforming to the various standards.

SLAUGHTER OF ANIMALS ACTS, 1933-54

Renewals of Licences to Slaughter 5

PREVENTION OF DAMAGE BY PESTS ACT, 1949

	TYPE OF PROPERTY	
	Non-Agricultural	Agricultural
Number of properties in district	4,142	60
Total number of properties inspected following notification	151	3
Number infested by rats	41	1
Number infested by mice	3	—
Number of properties inspected other than by notification	23	5
Number infested by rats	—	1
Number infested by mice	2	—

During the year 25% of the sewer manholes on the Council's sewerage system were treated, little evidence of rat infestation being found.

PET ANIMALS ACT, 1951

Under this act it is an offence to keep a pet shop except under the authority of a licence granted by a local authority. It applies to market stalls as well as established premises.

Number of licences granted 2

AGRICULTURE, SAFETY, HEALTH AND WELFARE (PROVISIONS), ACT, 1956

Sections 3 and 5 of this Act are administered by the local authority. There are 36 farms and holdings within the district.

The arrangements provided by the owners have been found to be satisfactory in relation to the size of the premises.

SCRAP METAL DEALERS ACT 1964

Under the provisions of this Act registration of dealers is carried out by the local authority, the Act being administered by the Police.

There are 9 registered dealers within the district.

1/9/61 ..	North'd County Council ..	Fouling of footpaths by dogs.

CARAVAN SITES AND CONTROL OF DEVELOPMENT ACT, 1960

Three private holiday sites are operated in the area licensed by the local authority for eight months in each year, opening on 1st March and closing on 31st October.

The sites are visited regularly during the season and any minor infringements are dealt with as they arise.

CLEAN AIR ACT, 1956

No formal action has yet been taken with regard to the establishment of smoke control areas within the Council's administrative area.

The public health department staff are always ready to advise on suitable smokeless fuel apparatus when renewals are contemplated by householders, many useful conversions having resulted from these discussions.

Technical information continues to be collated for the use in any future schemes.

NOISE ABATEMENT ACT, 1960

Number of visits and inspections 24

This is a useful Act which has been informally used to advantage. The occasional mobile vendor transgresses but usually only through ignorance of the regulations, and even these incidents are on the decline.

Discussions are ensuing with a local factory to minimise noise from the dust extractions fans.

HOUSING

TABULAR STATEMENT FOR YEAR 1967

NEW HOUSES COMPLETED DURING THE YEAR	With State Assistance	Unaided	Total
(a) By Local Authority ..	Nil	—	—
(b) By any other Author- ority	Nil	—	—
